

I listen to 106.7 FM in the Raleigh/Durham area of North Carolina. I am concerned about the negative effects for myself and my family of allowing LPFM stations to take priority over current FM translator service. This station serves a wide community base in our area with a value system that allows my entire family to listen. The vast majority of stations available in our area do not provide services that are focused on family values. Radio stations are becoming a place where anything goes - and that anything is often times something that young ears do not need to hear. I know several citizens in just my area that would be greatly disturbed to find our national K-LOVE station replaced. In a society where everyday occurrences are very discouraging and disheartening, this station provides for our community encouraging comments and music. Please reconsider this issue of allowing LPFM stations priority. Thank you.
